

Support Irium

Open-source development, public infrastructure, wallets, explorer improvements, and long-term ecosystem growth for the Irium network.

Irium is an independent blockchain project building decentralized, settlement-first infrastructure with no admin keys, no override powers, and no centralized control.

Open-source development

Independent engineering for protocol work, tooling, and release hardening.

Public infrastructure

Explorer, bootstrap, node reliability, and public service maintenance.

Self-custodial direction

No admin keys, no override powers, and no centralized control path.

Settlement-first roadmap

Long-term focus on practical decentralized commerce utility.

Why support Irium

Irium is an open-source, decentralized blockchain project being built with a clear long-term goal: create a trust-minimized settlement-first network for real commerce, without admin keys, override powers, or centralized control.

The project is developed independently, and community support helps fund the infrastructure, engineering, maintenance, and ecosystem work needed to keep Irium stable, useful, and growing.

- No admin keys
- No override powers
- No freeze or seizure controls
- Objective-only consensus
- Self-custodial ecosystem direction
- Open-source infrastructure

What contributions support

- Core protocol development
- Explorer, bootstrap, and public infrastructure
- Wallet and user experience improvements
- Testing, security hardening, and maintenance
- Documentation and onboarding
- Deployment, monitoring, and reliability improvements
- Future ecosystem tooling and integrations

Support for Irium is support for the network and its development, not a promise of financial return.

Support structure and contact

A practical support framework for open-source development, public infrastructure, and long-term ecosystem reliability.

Funding goals

\$500/month

Supports basic infrastructure and maintenance for public services such as explorer,

\$1,500/month

Supports ongoing development, wallet and explorer improvements, testing, and

\$3,000/month

Supports major implementation work for Phase 1 settlement foundation features and related tooling.

\$5,000+/month

Supports faster delivery, stronger testing, broader tooling, ecosystem support, and long-term network expansion.

Ways to support

- Monthly sponsorship
- One-time contribution
- Infrastructure sponsorship
- Milestone sponsorship
- Ecosystem partnership

Transparency

- Current monthly support level
- Infrastructure costs
- Major expenses
- Completed milestones
- Current development priorities
- Next funding targets

Important note

Contributions made to support Irium are voluntary contributions for open-source development, infrastructure, and ecosystem growth. They do not represent equity, ownership, profit rights, guaranteed returns, or investment contracts. Support for Irium is support for the network and its development, not a promise of financial return.
